AREAS OF EXPERTISE

AI-augmented development and prompt engineering for code generation, refactoring, and reviews

RESTful API design, microservices integration, and cross-platform web/mobile delivery

Front-end architecture with Svelte/SvelteKit, React, and vanilla JS/CSS

Back-end services with Node.js (Express/Fastify), authentication, and data modeling

DevOps (Docker, GitHub Actions), cloud deployments, and automated CI/CD pipelines

roadmap definition

mentoring

code quality

and standards

TECHNICAL SKILLS

JavaScript/Node.js

WORK EXPERIENCE

Full Stack Engineer

Tomahawk Edison Sciences Inc.

 April 2024 - Present  Remote, part-time

Developed custom prototypes and proof of concepts using Node.js, Svelte, and Tailwind.

- Built both desktop applications (Electron) and web applications (PWA) on a Linux Ubuntu server.
- Collaborated with cross-functional teams to enhance product features, improving user experience and engagement.
- Leveraged Supabase for database management, ensuring efficient data handling and storage solutions.

Founder, Independent Contractor

Profullstack, Inc.

 Mar 2018 – part-time  Remote

Consulted on JavaScript projects and REST APIs, focusing on blockchain front-end development. and imusify.com. travel solutions. driving community engagement.

- Developed user interfaces for innovative applications like Oblivion software
- Co-founded and served as CTO for Avenasea.com, enhancing corporate
- Led the creation of an NFT project, husko.money, on the Polygon mainnet,

Co-founder, Chief Technology Officer

Skatespot, Inc.

 Apr 2021 – Aug 2025  Equity-only, part-time

Spearheaded the development of the technology stack and architecture for Skatespot.com using Deno, TypeScript, and MongoDB. performance and reliability. technology solutions, driving innovation in the skateboarding community.

- Implemented Redis and RabbitMQ for efficient messaging, enhancing system
- Collaborated with cross-functional teams to ensure seamless integration of

Principal Engineer

Prognos Health, Inc.

 Mar 2021 – Jan 2022  Remote

Led the development of a new underwriting user interface using Svelte Kit and vanilla CSS, enhancing user experience. diagnosing anonymous patients using public data. healthcare data analytics.

- Collaborated with cross-functional teams to integrate AI technology for
- Contributed to the main product at Prognos Health, driving innovation in

Senior Software Engineer

IBM

 Nov 2014 – Mar 2018  Remote

Developed and implemented key features for API Connect Editor, enhancing user experience and functionality. processes post-acquisition by IBM. quality deliverables. support global users.

- Created a robust base application for rewrite, streamlining development
- Conducted UI testing using Protractor, Karma, and Chai, ensuring high-
- Integrated internationalization (i18n) and localization (l10n) features to

Senior Software Engineer

Chegg Inc.

 Dec 2010 - Sept 2013  Santa Clara, California, United States

Developed and maintained a robust e-commerce cloud platform, enhancing user experience and performance. ensuring seamless functionality. quality and reducing bugs by 30%. solutions with business objectives.

- Utilized PHP 5 to build dynamic front-end interfaces from design mocks,
- Implemented Test Driven Development (TDD) practices, improving code
- Collaborated closely with the Director of Engineering to align technical

Prototyper

Yahoo

 Jan 2010 – Dec 2010  Sunnyvale, California, United States

Collaborated with the Yahoo design team to prototype innovative features, enhancing user experience. ensuring seamless functionality. facilitating effective design testing.

- Utilized jQuery to develop responsive prototypes for modern browsers,
- Mocked and fetched data from REST APIs to simulate real-world scenarios,

Senior Web Developer

PayPal

 Oct 2003 - June 2006  San Jose, California, United States

Developed and implemented the XML Presentation Tier for PayPal's web architecture team, enhancing user experience. improved system efficiency. solutions with business objectives. ---

- Utilized Perl programming to streamline data processing, resulting in
- Collaborated closely with the Director of Engineering to align technical

SELECTED PROJECTS

Primate.js

Open-source polymorphic development platform. Role: contributor/advocate.

EDUCATION

San Diego State University

B.S., Business Administration (1993–1998)

ADDITIONAL HIGHLIGHTS

AI-Driven Collaboration

Daily use of Cursor, Copilot, and ChatGPT to write, review, and maintain high-quality JavaScript/Node/Svelte code.

Mentorship & Standards

Guides teams in prompt strategy, AI-assisted reviews, component patterns, and maintainable architectures.

Remote-first

Strong async communication, agile delivery, and documentation practices across distributed teams.
