WORK EXPERIENCE

Founder, Independent Contractor

Profullstack, Inc.

Mar 2018 - Present

Remote

Consulted on JavaScript projects and REST APIs, focusing on blockchain front-end development. and imusify.com. travel solutions. driving community engagement.

- Developed user interfaces for innovative applications like Oblivion software
- Co-founded and served as CTO for Avenasea.com, enhancing corporate
- · Led the creation of an NFT project, husko.money, on the Polygon mainnet,

Co-founder, Chief Technology Officer

Skatespot, Inc.

77 Apr 2021 - Present

P Equity-only, part-time

Spearheaded the development of the technology stack and architecture for Skatespot.com using Deno, TypeScript, and MongoDB, performance and reliability, technology solutions, driving innovation in the skateboarding community.

- Implemented Redis and RabbitMQ for efficient messaging, enhancing system
- Collaborated with cross-functional teams to ensure seamless integration of

Principal Engineer

Prognos Health, Inc.

77 Mar 2021 – Jan 2022

Remote

Led the development of a new underwriting user interface using Svelte Kit and vanilla CSS, enhancing user experience. diagnosing anonymous patients using public data. healthcare data analytics.

- · Collaborated with cross-functional teams to integrate AI technology for
- Contributed to the main product at Prognos Health, driving innovation in

Senior Software Engineer

IBM

Nov 2014 – Mar 2018

Remote

Developed and implemented key features for API Connect Editor, enhancing user experience and functionality. processes post-acquisition by IBM. quality deliverables. support global users.

- Created a robust base application for rewrite, streamlining development
- Conducted UI testing using Protractor, Karma, and Chai, ensuring high-
- Integrated internationalization (i18n) and localization (I10n) features to

Senior Software Engineer

Chegg Inc.

Topic 2010 - Sept 2013 Santa Clara, California, United States

Developed and maintained a robust e-commerce cloud platform, enhancing user experience and performance. ensuring seamless functionality, quality and reducing bugs by 30%, solutions with business objectives.

- · Utilized PHP 5 to build dynamic front-end interfaces from design mocks,
- Implemented Test Driven Development (TDD) practices, improving code
- Collaborated closely with the Director of Engineering to align technical

Prototyper

Yahoo

📆 Jan 2010 – Dec 2010 📍 Sunnyvale, California, United States

Collaborated with the Yahoo design team to prototype innovative features, enhancing user experience. ensuring seamless functionality. facilitating effective design testing.

- · Utilized jQuery to develop responsive prototypes for modern browsers,
- Mocked and fetched data from REST APIs to simulate real-world scenarios,

Senior Web Developer

PavPal

📅 Oct 2003 - June 2006 🕴 San Jose, California, United States

Developed and implemented the XML Presentation Tier for PayPal's web architecture team, enhancing user experience. improved system efficiency. solutions with business objectives. ---

- · Utilized Perl programming to streamline data processing, resulting in
- Collaborated closely with the Director of Engineering to align technical

SELECTED PROJECTS

Primate.js

Open-source polymorphic development platform. Role: contributor/advocate.
