AREAS OF EXPERTISE

AI-augmented development and prompt engineering for code generation, refactoring, and reviews

RESTful API design, microservices integration, and cross-platform web/mobile delivery

Front-end architecture with Svelte/SvelteKit, React, and vanilla JS/CSS

Back-end services with Node.js (Express/Fastify), authentication, and data modeling

DevOps (Docker, GitHub Actions), cloud deployments, and automated CI/CD pipelines

roadmap definition

mentoring

code quality

and standards

TECHNICAL SKILLS

JavaScript/Node.js

HTML

CSS

Svelte/SvelteKit

React

vanilla JS

accessibility (a11y)

Express

Fastify

REST APIs

Webhooks

MongoDB

PostgreSQL

JSON/CSV pipelines

Docker

GitHub Actions

Ubuntu

NGINX

pm2

Chai

Karma

Protractor; component patterns; E2E/testable UIs

Polygon

Ethers.js/web3

NFT utilities

wallet integrations

Cursor

GitHub Copilot

ChatGPT (code generation

review

and troubleshooting)

WORK EXPERIENCE

Founder, Independent Contractor

Profullstack, Inc.

📅 Mar 2018 – Present   📍 Remote

Delivered JavaScript consulting and REST APIs with a focus on blockchain-aware front-ends and integrations.

- Co-founded avenasea.com (corporate travel); acted as interim CTO; introduced AI-driven prototyping to speed feature delivery.
- Founded husko.money (Polygon NFT/memecoin), using AI-assisted scaffolding for contracts, front-end, and automation.
- Implemented Dockerized CI/CD with automated testing and streamlined deployments.
- Tooling: Node.js, Svelte/SvelteKit, React, Express/Fastify, Ethers.js/web3, Docker, GitHub Actions.

Co-founder, Chief Technology Officer

Skatespot, Inc.

📅 Apr 2021 – Present   📍 Equity-only, part-time

Defined technology stack and architecture for Skatespot.com using Deno and React Native.

- Managed APIs and MongoDB on Ubuntu; introduced DevOps best practices to improve reliability.
- Mentored a small dev team; established AI-aided coding guidelines for faster code reviews and feature work.
- Tooling: Deno, React Native, MongoDB, Ubuntu, NGINX, pm2, GitHub.

Principal Engineer

Prognos Health, Inc.

📅 Mar 2021 – Jan 2022   📍 Remote

Built a next-gen underwriting UI with SvelteKit and vanilla CSS; partnered closely with product/design/data science.

- Established component standards and accessibility checks; used conversational AI to accelerate refactors and edge-case reviews.
- Tooling: SvelteKit, Node.js, REST, Vite, Vanilla JS/CSS.

Senior Software Engineer

IBM

📅 Nov 2014 – Mar 2018   📍 Remote

Shipped key features for API Connect Editor, including a base application rewrite that improved performance and developer experience. ---

- Implemented robust React components with i18n/l10n support.
- Ensured high UI test coverage with Protractor, Karma, and Chai.
- Tooling: React, JavaScript, i18n, Protractor, Karma, Chai.

SELECTED PROJECTS

Primate.js
Open-source polymorphic development platform. Role: contributor/advocate.

FastestEngineer
Premium SaaS boilerplate built on Svelte and Primate.js.

My GitHub
Personal account with AI experiments and JS projects: https://github.com/ralyodio

Profullstack on GitHub
Organization projects: https://github.com/profullstack

EDUCATION

San Diego State University
B.S., Business Administration (1993–1998)

ADDITIONAL HIGHLIGHTS

🚀 **AI-Driven Collaboration**
Daily use of Cursor, Copilot, and ChatGPT to write, review, and maintain high-quality JavaScript/Node/Svelte code.

⚡ **Mentorship & Standards**
Guides teams in prompt strategy, AI-assisted reviews, component patterns, and maintainable architectures.

💎 **Remote-first**
Strong async communication, agile delivery, and documentation practices across distributed teams.
